Thanks Jeff, I'll have Tracee (our scheduler) reconfirm your number. We did pass your cell phone number onto residents given the short schedule.

Mark,

EPA will absolutely protect all PPI information for the residents.

Thank you for the list. I assume they have my direct contact information as we discussed? Please make sure the numbers given them are correct. The resident on Steeplechase called my cell phone last night and said he was given 629-7688 for my office instead of 692-7688. Can you please double check this.

We will be available to pre-meet on Wednesday if that works best.

The separation of samples for shipment is something I had also contemplated, it makes sense not to run a high sample prior to low level at the lab, this is a good strategy.

Brent and I are available to discuss other logistical issues at any time prior to Wednesday.

Thank you,

Jeff Kimble, EPA OSC

Subject: CONFIDENTIAL - EPA-WWW Post POET Installation - Split Sampling

Good Morning Jeff:

Attached is a list of homes and schedule for residents who have given permission for EPA to view/split samples with our team. For many of these residents, this will be the first post-filter testing. Please be sensitive if they do not completely understand the purpose or process.

We ask you keep their personal information confidential to protect their privacy.

The sampling frequency column gives information about the relative, expected PFAS concentrations. We suggest you warn the labs to expect higher concentrations in the influent samples from the weekly and quarterly locations. We store and ship the influent samples from the weekly sampling locations separately to minimize the potential for cross-contamination.

Let us know if you want to meet at a central location before the 8 am appointment or if you have any questions.

Mark A. Westra

Associate Principal
